SAN DIEGO

The Honorable City Council of
the City of Chula Vista, California

**Independent Auditor's Report on Internal Control Over Financial Reporting and on
Compliance and Other Matters Based on an Audit of Financial Statements
Performed in Accordance With Government Auditing Standards**

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Chula Vista, California (City) as of and for the year ended June 30, 2008, which collectively comprise the City's basic financial statements, and have issued our report thereon dated January 21, 2009. Our report included an explanatory paragraph describing the implementation of new accounting standards. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the City of Chula Vista's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the City's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control over financial reporting that we consider to be significant deficiencies.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or a combination of control deficiencies, that adversely affects the City's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the City's financial statements that is more than inconsequential will not be prevented or detected by the City's internal control. We consider the deficiencies described below in 08-1 through 08-6 to be significant deficiencies in internal control over financial reporting.

08-1 Developer Deposits

Comment

During our review of developer deposits we noted multiple cash bond deposits outstanding since 1987-1991 for engineering and planning.

Recommendation

Cash bond deposits should be closely monitored and reconciled on a regular basis to avoid carrying a liability for a long period of time and to recognize revenue when earned.

Management Response

Planning and Public Works departments annually review deposit accounts to determine if they are eligible for escheatment. The departments are currently conducting a review of all outstanding deposits to determine whether they are still valid or should be escheated. Finance staff will assist the Departments in reviewing these deposits annually.

08-2 Investment Report

Comment

During our review of the June 30, 2008 investment report we noted total cash and investments was understated by \$1.8 million, the understatement was caused by the following:

- Loan proceeds received at the end of the year were not included in the investment report.
- Investments held by bond trustees for the fiduciary funds were not stated at fair market value on the City's records.

Recommendation

All investments should be stated at fair value, the fair value represents the amount the seller would be paid for the investment if it were to be sold. In addition, all investment transactions should be included in the report to ensure this reflects the total cash and investment held by the City or in the City's name at any given time.

Management Response

Management concurs with the finding and will take steps to implement the recommendation. This omission of the loan proceeds and the understatement of the investments were an oversight due to the retirement of the associate accountant and the transition of these duties to new staff.

08-3 Interest Receivable

Comment

During our testwork of interest receivable and corresponding revenues we noted total interest receivable and interest revenue were overstated by \$800,000 because accrued interest on Local Agency Investment Fund (LAIF) was included twice.

Recommendation

The review process is an essential part of internal controls; management should closely review unusual or major transactions before these are posted to the general ledger. By improving the review process, errors can be detected in a timely manner.

Management Response

Management concurs with the finding and will take steps to implement the recommendation.

08-4 Lease

Comment

During our review of the City Council meeting minutes we noted an approval for a capital lease agreement that was executed during the current fiscal year but was not recorded in the City's general ledger. Since the finance staff was unaware of the lease, the interest payments on the lease were miscoded to a supplies expense account.

Recommendation

We recommend Finance track all leases approved and entered into by the City to ensure they are properly recorded in the general ledger. We further recommend that all key finance staff review the City Council agendas and approved minutes on a regular basis.

Management Response

Management concurs with the finding and will ask staff to continue to review City Council agendas and approved minutes on a regular and timely basis.

08-05 Capital Assets

Comment

During our testwork of capital assets, we noted prior year construction-in-progress related to infrastructure was understated by \$ 2.1 million. The amount was correctly classified as a capital improvement project but did not make distinction between operations and maintenance type projects and infrastructure projects.

Recommendation

The Public Works department should correctly identify those capital improvement projects that are for the City's infrastructure in order for the amounts to be properly reported in the City's financial records.

Management Response

Management concurs with the finding and will implement the auditor's recommendation. Public Works has recently purchased capital improvement project (CIP) management software that collects data relating to Governmental Accounting Standards Board statement 34 for required disclosures related to infrastructure amounts, which should assist the department in submitting information accurately and on a timely basis.

08-06 Deferred Revenue

Comment

During our testwork of revenues, we noted that the City received a payment of \$755,952 from Scripps Memorial Hospital which had been due to the City since FY 03/04. The City had an outstanding receivable and a corresponding deferred revenue recorded in the general fund. However, the receipt of \$755,952 was recorded in a miscellaneous revenue account, and the receivable and deferred revenue were still outstanding in the general fund. The result was receivable and deferred revenue were overstated in the amount of \$755,952.

Recommendation

We recommend the City to implement procedures to ensure receivables and deferred revenues are reconciled on an annual basis and to ensure the assets and the liabilities are properly stated. We further recommend cash receipt postings be reviewed more carefully prior to recording.

Management Response

City staff does perform an annual reconciliation of receivables to deferred revenues and have added the additional control of blocking access to the miscellaneous revenue account to prevent the recording of revenue into this account without prior review and approval by the Fiscal Operations Manager and/or the Senior Accountant. Additionally, the staff person handling the deferred revenue and receivable accounts retired mid fiscal year which left the position vacant until the end of the fiscal year. The new staff person hired at the end of June did not realize that there was an existing receivable for the amount. The error would have been discovered at fiscal year end when reconciling the receivable accounts for preparation of the City's financial statements.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the City's internal control.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are also considered to be material weaknesses. However, of the significant deficiencies described above, we consider items 08-03, 08-04, 08-05 and 08-06 to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City of Chula Vista's basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.

We noted certain matters that we reported to management of the City of Chula Vista in a separate letter dated January 21, 2009.

The City's response to the findings identified in our audit are described above. We did not audit the City's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the City Council, management and others within the City of Chula Vista, and the City's federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

SAN MARCOS

SAN DIEGO

The Honorable City Council of
the City of Chula Vista, California

**Independent Auditor's Report on Compliance with Requirements
Applicable to Each Major Program, Internal Control Over
Compliance and on the Schedule of Expenditures of Federal
Awards in Accordance with OMB Circular A-133**

Compliance

We have audited the compliance of the City of Chula Vista (City) with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement that are applicable to each of its major federal programs for the year ended June 30, 2008. The City's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the City of Chula Vista's management. Our responsibility is to express an opinion on the City of Chula Vista's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the City of Chula Vista's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the City of Chula Vista's compliance with those requirements.

In our opinion, the City complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2008.

Internal Control Over Compliance

The management of the City of Chula Vista is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered the City of Chula Vista's internal control over compliance with requirements that could have a direct and material effect on

a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the City's internal control over compliance.

A control deficiency in the City's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance of a federal program on a timely basis. A significant deficiency is a control deficiency, or a combination of control deficiencies, that adversely affects the City's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the City's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the City's internal control.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

Schedule of Expenditures of Federal Awards

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Chula Vista as of and for the year ended June 30, 2008, and have issued our report thereon dated January 21, 2009. Our report included an explanatory paragraph describing the implementation of new accounting standards. Our audit was performed for the purpose of forming our opinions on the financial statements that collectively comprise the City's basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of the City Council, management and others within the City of Chula Vista, and the City's federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

CITY OF CHULA VISTA
Note to Schedule of Expenditures of Federal Awards
June 30, 2008

(1) Summary of Significant Accounting Policies Applicable to the Schedule of Expenditures of Federal Awards:

(a) Scope of Presentation

The accompanying schedule presents only the expenditures incurred by the City of Chula Vista (City) that are reimbursable under federal programs of federal financial assistance. For the purposes of this schedule, federal financial assistance includes both federal financial assistance received directly from a federal agency, as well as federal funds received indirectly by the City from a non-federal agency or other organization. Only the portion of program expenditures reimbursable with such federal funds is reported in the accompanying schedule. Program expenditures in excess of the maximum federal reimbursement authorized or the portion of the program expenditures that were funded with state, local or other non-federal funds are excluded from the accompanying schedule.

(b) Basis of Accounting

The expenditures included in the accompanying schedule were reported on the modified accrual basis of accounting. Under the modified accrual basis of accounting, expenditures are incurred when the City becomes obligated for payment as a result of the receipt of the related goods and services. Expenditures reported included any property or equipment acquisitions incurred under the federal program.

(c) Loan Programs

The City participates in certain federal award programs that sponsor revolving loan programs, which are administered by the City. These programs maintain servicing and trust arrangements with the City to collect loan repayments. The funds are returned to the programs upon repayment of the principal and interest and programs funded by these repayments are reported as expenditures in the Schedule. The federal government has imposed certain continuing compliance requirements with respect to the loans rendered under the programs. In accordance with Subpart B, Section 205 of the Office of Management and Budget Circular A-133, the City has reported the value of the total outstanding and new loans made during the current year.

The following is a summary of the loan program balances and activities that have continuing compliance requirements at June 30, 2008:

| <u>Program Title</u> | <u>CFDA Number</u> | <u>June 30, 2008 Loans Outstanding</u> | <u>Prior Year Loans With Continuing Compliance Requirements</u> | <u>Fiscal Year 2008 Loan Disbursements</u> |
|-------------------------------------|------------------------|--|---|--|
| Home Investment Partnership Program | 14.239 | \$7,923,284 | \$6,933,284 | \$990,000 |
