

Chula Vista 2024 Climate Action Plan Update

Waste Sector

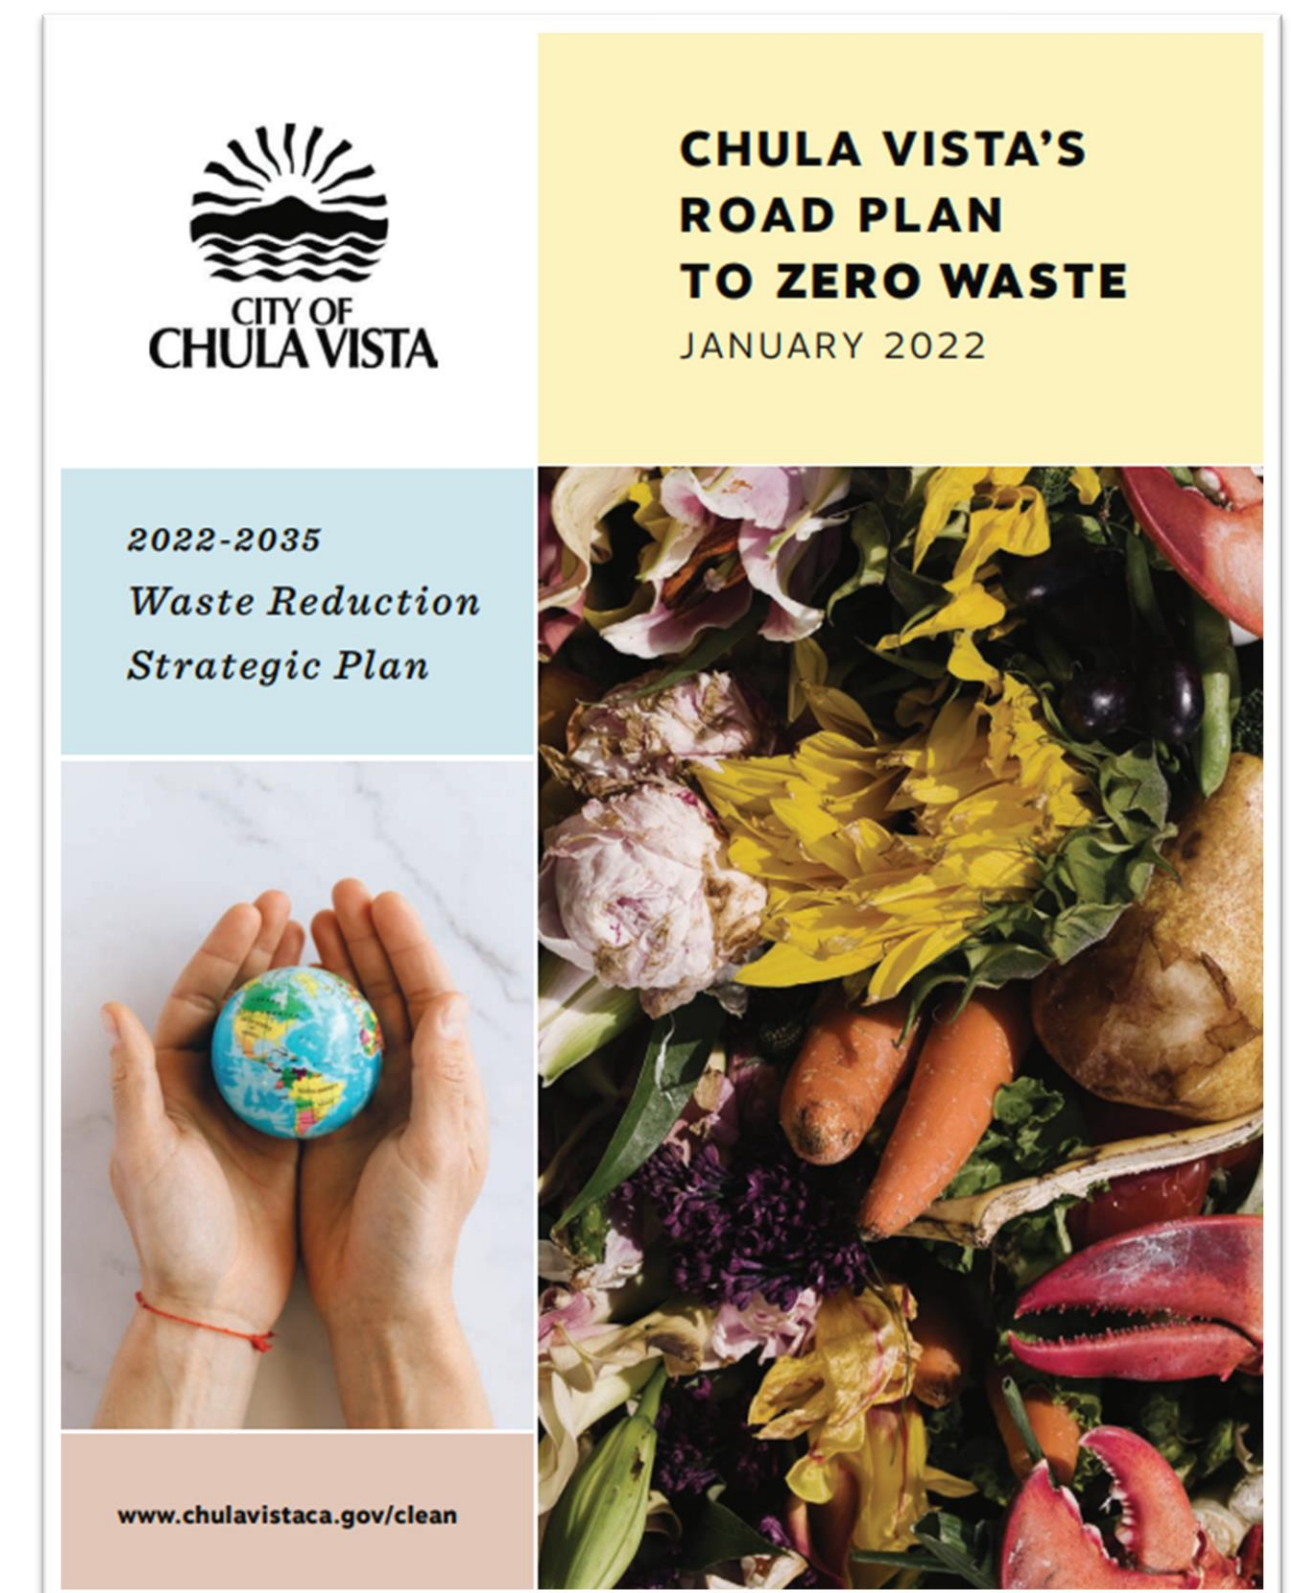

Reduce and Recycle Solid Waste

Measure 7.1: Implement Zero Waste Plan

Goal: Divert 90% of waste from landfills (equivalent to 1.1 lbs. per capita per day disposal) by 2030

Supporting Actions:

- Implement adopted Zero Waste Plan Zero Waste Strategies
 - 1 - Promote and support source reduction and reuse
 - 2 - Reduce the use of toxic materials
 - 3 - Promote and educate on zero waste principles
 - 4 - Support the recycling industry as an innovative engine for regional economic development
 - 5 - Improve education in trash and recycling programs
 - 6 - Keep organic materials out of landfills
- Adopt single use plastic ban (CCWG recommendation)
- Urban habitat restoration requirement on new development that incorporates the use of residential organic-derived compost
- Support circular economy
- Support zero waste city events
- Support community gardens

Water Sector

Water Conservation and Decarbonization

Measure 8.1: Increase Water Conservation and Decarbonization

Goal: Reduce emissions from water usage by 60% by 2030 and 90% by 2045

Supporting Actions:

- Require (Tier 2) CALGreen or similar water efficiency requirements and reduced outdoor water use for landscaping requirements for new and existing development
- Reduce water use intensity (gal/sq ft) at City facilities by 20%
- Evaluate floating solar to reduce water evaporation and produce clean energy
