## SUCCESS STORY

The Chula Vista Homeless Outreach Team referred a client to City Net in early May after learning that she had been experiencing chronic homelessness for more than two years and her family situation had suffered greatly. In those years, she had primarily lived out of her car while trying to balance school and a stable job. She expressed an interest in the Chula Vista Village shelter, and since arriving, the client made significant progress with her (Cont. Page 2)

3.3 months

Average Length of Stay

## MONTHLY HIGHLIGHT:

In the month of June, the residents of the shelter were invited to a staff-led Fun Run! Several of the clients participated and had a great time getting some exercise with their cohorts!

# SUCCESS STORIES

housing goals. Her case managers assisted with vouchers and referrals to acquire all her necessary documents so that she could apply for Tenant-Based Rental Assistance (TBRA). In June, the client graduated from college and began applying for nursing schools as she received word that she had been approved for the rental assistance program! After completing her paperwork, she began searching for apartments, and before the end of the month, she was approved for her first choice!

- A client of the Chula Vista Village was living with her mother when she passed away. This tragic loss was one of the factors that contributed to the client becoming homeless. Her case managers supported her through her grieving process while trying to reassess her housing goals. Eventually, they completed assessments to determine that the client was at risk of being homeless after the loss of her mother, and the client was matched to a new housing development in San Diego. The client moved in by the end of June and thanked the case managers for their support in what could have been a much more stressful process without City Net.
